### **Regulatory Compliance Inspection from ISI**

Dear Parents,

As you will recall we had a brought forward regulatory compliance inspection from ISI in May. The finalised report can be found [here](#).

You will see from the report that we were compliant in all areas except one. The area highlighted was part of the fire safety regulations and I want to take this opportunity to outline what was identified and set out what the school has done to address these.

The failings identified that breached regulations were with two fire doors and with associated documentation. One door in Portland Place was sticking beyond an acceptable limit. Another door in Harford House had a release mechanism that no longer met regulatory standards. Both of these have been repaired/replaced and both now meet regulatory standards. The associated documentation is also now up-to-date and compliant.

If you have any further questions on this please do not hesitate to contact me.

Yours faithfully,

David Bradbury
